Papers were identified for inclusion in the review by examination of full text

Let's look now at some formal and technical definitions of Reflective Practice. Another characteristic of critical thinking identified by many sources is metacognition. Self reflection is like looking into a mirror and describing what you see.

Becoming aware of them is what makes critical thinking possible. However, the mere experience of carrying out some developmental activity may not be sufficient to enable future improvements and thus many medical specialities encourage their practitioners to reflect on their experiences.
